- * Dr. Debrupa Chakraborty (Faculty, Dept of Commerce, Programme Co-Ordinator)
- * Prof. L T sherpa (Faculty , Dept of Commerce)

Objective:

It is an initiative to inculcate experiential learning amongst the students of B. Com Semester-VI

Brief description about nature of exposure students have obtained and how it has helped them in supplementing their theoretical knowledge:

We are very grateful to our respected teachers of our commerce department, for giving us such an Opportunity to interact with SIR TARAK NATH ROY – Head of production department and MS DEBAPRIYA SARKAR – Head of Human Resource (HR) Division. We came to know about 'Exide Industries Limited' in depth. Exide Industries Limited (Exide) is an Indian multinational storage battery manufacturing company, headquartered in Kolkata, India. It is the largest manufacturer of lead-acid storage batteries and power storage solutions provider in India. They are very much dynamic and up to date with the upcoming technology, which helped us a lot for our future arrivals. The behaviour, attitude, communication, learning skills, Approach, we need everything in us to accommodate with the on-going environment and achieve the goals. We had a great experience.

Feedback of Students about role of Teachers in the Industry Visit:

The Teachers were very interactive, friendly and very helpful with us to get accustomed with the Environment. They answered all our questions, cleared our doubts. It was not a one-way Communication but a two-way interactive session. He explained how one should have an attitude or Approach towards their work. He also gives us some examples of his professional life The session was a delightful one and the teachers too. The industrial visit has played an important role in our life, which impacted us for a long run.

Suggestions of students for further betterment of this type of initiative to be taken by the Department in future :

The college faculty should take this type of initiatives more and make a scope for their students to Know more about the practical world rather than having an online session. Different types of Seminars, industrial visits, cultural events helped the students to get an exposure, to erase the inner fear of communicating, approaching power and also gain practical as well as theoretical knowledge about the outer space. so we are very much thankful to our esteemed teachers and the Department for this opportunity.
